

**The Popular RP-2415 Dispensing System
Optimized for 2- Part Epoxy & Sealants**

Robotic Sealant Applicator

Benchtop unit features a compact positive displacement 2 part meter / mixing system to dispense your material directly from standard cartridges.

Large 24" Wide Work Area

Ideal for dispensing onto larger parts or "step & repeat" mode for processing parts in trays & pallets.

A True Dispensing Solution

Save time and money by automating that messy and tedious manual application to a safer and streamlined solution that will yield faster production and result in more consistent, accurate (and also more aesthetic) material applications.

Important Advantages:

- No PC required
- No expensive meter / mix tanks
- Dispense from your cartridge
- Self contained and compact
- Easy to fixture
- Built in purging control
- Integrated cabling / plumbing
