

Robotic Hot Melt Applicator

Benchtop unit automates hot melt glue dispensing with preprogrammed dots, dashes, lines etc. Also reads Cad DXF, PLT & G Code files.

Large 24" Wide Work Area

Ideal for dispensing onto larger parts or "step & repeat" mode for processing parts in trays and pallets. Great for quick changeovers when running families of products.

A True Dispensing Solution

Save time and money by automating that messy and tedious manual application to a safer and streamlined solution that will yield faster production and result in more consistent, accurate (and also more aesthetic) material applications.

The Popular RP-2415 Dispensing Robot With complete hot melt glue system

Important Advantages:

- No PC required
- No expensive meter / mix tanks
- Dispense in any geometry
- Self contained and compact
- Easy to fixture
- Built in purging control
- Integrated cabling / plumbing
