

Manufacture Parts from CAD

This benchtop system is easy to setup and operate and is ideal for machining slots, holes, depaneling, trimming, etc. The rigid drive system rivals large CNC machines.

Large Open Work Area

Solid base plates provides the ideal foundation for stable mounting of fixturing, vacuum chucks, magnetic bases, etc. Your parts remain static, while the spindle moves from overhead.

A True Compact CNC Solution

In addition to dozens of engraving functions, the system includes font files and the ability to automatically serialize and date code your parts.

**The Popular RP-1215 Benchtop Robot
Optimized for Micro Machining, Depaneling Engraving**

Simple and Powerful Controls:

- No PC required for operation
- DXF, PLT & G-Code Input
- Performance plus leadscrews
- Self contained and compact
- Easy to fixture
- Built in Tool Files
- Integrated cabling / plumbing
- Available in 24" X 15" also
